Problem A: Egypt 11/9/11 8:36 PM

# **Problem A: Egypt**

A long time ago, the Egyptians figured out that a triangle with sides of length 3, 4, and 5 had a right angle as its largest angle. You must determine if other triangles have a similar property.

## The Input

Input represents several test cases, followed by a line containing 0 0 0. Each test case has three positive integers, less than 30,000, denoting the lengths of the sides of a triangle.

# The Output

For each test case, a line containing "right" if the triangle is a right triangle, and a line containing "wrong" if the triangle is not a right triangle.

#### **Sample Input**

6 8 10 25 52 60 5 12 13 0 0 0

## **Output for Sample Input**

right wrong right
